Fight Lupus

LUPUS IS COMPLEX AND UNPREDICTABLE

Lupus often strikes multi-organs and attacks at random – the brain, lungs, heart, kidney, and blood vessels are all at risk

RESEARCH FUNDING IS LACKING

Due to the disease complexity and low profile, research is under funded and there have been no new treatments in fifty years

THERE IS NO CURE!

There is only suppression with steroids and anti-cancer type medications that may or may not be successful
